Summary

Built and deployed full-stack web apps using React, TypeScript, Node.js and MongoDB, and created Power BI dashboards to turn data into clear insights. Completed a web development internship at iStudio while studying Computer Science in the final year. Designed REST APIs, modelled databases, tested and debugged APIs, and wrote clear documentation. Delivered clean, responsive interfaces and shipped live applications that solve real problems for users, moving across frontend, backend and deployment.

Education

REVA University, Bangalore, Karnataka

2023 - 2027

Bachelor of Technology in Computer Science and Information Technology

KV AFS Avadi, Chennai – Class XII (CBSE)

KV AFS Avadi, Chennai – Class X (CBSE)

Projects

Campus Event Finder – React, TypeScript, Node.js, Express.js, MongoDB, Socket.IO

[Live: c-e-s.vercel.app](https://c-e-s.vercel.app)

- Built and deployed a full-stack platform where students find and register for campus events and organizers manage them, with role-based access for students, working professionals and organizers.
- Implemented 3 login options: email with OTP verification, Google and Microsoft, secured with JWT.
- Added QR code registration and attendance, team sign-up, registration deadlines and waitlists.
- Built real-time notifications with Socket.IO and automated emails, plus attendance certificates, event feedback and Q&A comments.
- Tested APIs and fixed bugs across login, registration, QR and attendance flows.

TaskFlow – React, Vite, Node.js, Express.js, MongoDB Atlas

[Live: taskflow-tawny-gamma.vercel.app](https://taskflow-tawny-gamma.vercel.app)

- Built a full-stack task management app with a REST API (GET, POST, PUT, DELETE) and persistent storage on MongoDB Atlas.
- Added search by title, filters by status and priority, sorting by date or priority, and due-date validation that rejects past dates.
- Made the UI responsive for desktop and mobile and deployed it on Vercel with a serverless API entry point.

Credit Card Financial Dashboard – Power BI, DAX, Data Modeling, Data Visualization

- Built a 2-page Power BI dashboard (Transactions and Customers) on 10,000+ customer records and credit card data, with KPI cards for revenue, transaction amount, interest income and transaction count.
- Analysed revenue by card type, expenditure type, chip usage, customer job, education, income group, age group, marital status, dependents and top 5 states, along with quarterly and weekly trends, to show which segments drive revenue.
- Modelled the datasets, wrote DAX measures for revenue and KPIs, and added slicers for interactive filtering; exported a PDF report for viewers without Power BI.

Skills

- | | | |
|--------------|------------------------|-------------------------------|
| • Python | • Pandas & NumPy | • MongoDB |
| • SQL | • Matplotlib | • MySQL |
| • JavaScript | • React.js | • PostgreSQL |
| • TypeScript | • HTML5 & CSS3 | • Git & GitHub |
| • C++ | • Node.js & Express.js | • Vercel & Render |
| • Power BI | • REST API Design | • CI/CD |
| • DAX | • JWT Authentication | • DSA, OOP & Design Patterns |
| | • Socket.IO | • Problem-Solving & Debugging |

Certifications

- Introduction to Cybersecurity – Cisco Networking Academy (Sep 2026)
- Leadership Principles for Software Engineers – Advancing Women in Tech, via Coursera (Sep 2026)
- Gemini Certified Student – Google for Education (2025)
- AI & ML Masterclass – Eureka Association, in collaboration with REVA University
