Summary

Built and deployed full-stack web apps using React, TypeScript, Node.js and MongoDB, and created Power BI dashboards to turn data into clear insights. Designed REST APIs, modelled databases and delivered clean, responsive interfaces from design to deployment. Tested and debugged APIs to find and fix bugs across login, registration and attendance flows. Deployed live applications on Vercel and Render using Git and GitHub. Applied Generative AI tools to speed up coding and problem solving. Wrote clear documentation. Solved real user problems by building, testing and deploying complete applications from start to finish.

Education

REVA University, Bangalore, Karnataka 2023 - 2027
Bachelor of Technology in Computer Science and Information Technology
KV AFS Avadi, Chennai – Class XII (CBSE)
KV AFS Avadi, Chennai – Class X (CBSE)

Projects

Campus Event Finder – React, TypeScript, Node.js, Express.js, MongoDB, Socket.IO Live: c-e-s.vercel.app

- Built and deployed a full-stack platform where students find and register for campus events and organizers manage them, with role-based access for students, working professionals and organizers.
- Tested APIs, then debugged and fixed issues across login, registration, QR and attendance flows.
- Implemented 3 login options: email with OTP verification, Google and Microsoft, secured with JWT.
- Developed QR code registration and attendance, team sign-up, registration deadlines and waitlists.
- Integrated real-time notifications with Socket.IO and automated emails, and added attendance certificates, event feedback and Q&A comments.

TaskFlow – React, Vite, Node.js, Express.js, MongoDB Atlas Live: taskflow-tawny-gamma.vercel.app

- Built a full-stack task management app with a REST API (GET, POST, PUT, DELETE) and persistent storage on MongoDB Atlas.
- Implemented search by title, filters by status and priority, sorting by date or priority, and due-date validation that rejects past dates.
- Optimized the UI for desktop and mobile and deployed it on Vercel with a serverless API entry point.

Credit Card Financial Dashboard – Power BI, DAX, Data Modeling, Data Visualization

- Designed and built a 2-page Power BI dashboard (Transactions and Customers) on 10,000+ customer records and credit card data, with KPI cards for revenue, transaction amount, interest income and transaction count.
- Analysed revenue by card type, expenditure type, chip usage, customer job, education, income group, age group, marital status, dependents and top 5 states, along with quarterly and weekly trends, to identify which segments drive revenue.
- Modelled the datasets, developed DAX measures for revenue and KPIs, and implemented slicers for interactive filtering; exported a PDF report for viewers without Power BI.

Skills

Programming: JavaScript, TypeScript, Python, Java, C++, SQL

Web Development: React.js, Node.js & Express.js, REST API Design, HTML5 & CSS3, JWT Authentication, Socket.IO

Databases: MongoDB, MySQL, PostgreSQL

Tools & Core: Git & GitHub, CI/CD, API Testing, Vercel & Render, Generative AI Tools, Problem-Solving & Debugging, OOP & Design Patterns, DSA

Data & Analytics: Power BI, DAX, Microsoft Excel, Microsoft PowerPoint, Pandas & NumPy, Matplotlib, Data Analysis, Data Visualization

Certifications

- Introduction to Cybersecurity – Cisco Networking Academy (Sep 2026)
- Gemini Certified Student – Google for Education (2025)
- AI & ML Masterclass – Eureka Association, in collaboration with REVA University
- Leadership Principles for Software Engineers – Advancing Women in Tech, via Coursera (Sep 2026)
