PROFILE SUMMARY

Final-year Computer Science student with hands-on experience in Power BI, skilled at building interactive dashboards and data visualizations that turn raw data into clear, actionable insights. Backed by a solid foundation in SQL, NumPy, and core data structures, along with certifications in AI & ML and Google's Gemini program. Also brings full-stack development experience with React.js, Node.js, and MongoDB. A quick learner with a practical, detail-oriented approach to uncovering trends and presenting them clearly.

EDUCATION

B.Tech in Computer Science and Information Technology, REVA University

2023 – 2027

Class XII (Senior Secondary), KV AFS Avadi, Chennai — CBSE Board

Class X (Secondary), KV AFS Avadi, Chennai — CBSE Board

SKILLS

- **Languages:** Python, JavaScript, C++, SQL
- **Frontend:** React.js, HTML5, CSS3, Responsive UI, Component-Based Architecture
- **Backend:** Node.js, REST APIs, Socket.IO, JWT Authentication
- **Databases:** MongoDB, MySQL
- **Tools & Cloud:** Git, GitHub, Vercel, CI/CD
- **Data & Visualization:** Pandas, NumPy, Power BI, Matplotlib
- **Core CS Concepts:** OOP, DBMS, Computer Networks, SDLC, API Integration, Data Structures And Algorithms

ACADEMIC PROJECTS

Campus Event Finder *React.js | Node.js | MongoDB | Socket.IO | REST APIs*

- Built a full-stack event management app where users can create, browse, and get live updates on campus events.
- Used Socket.IO to push real-time notifications so users see event changes without refreshing the page.
- Built reusable React components and connected them to REST APIs for creating and updating events.
- Added automatic event reminders using Node-cron, and cleaned up frontend state handling to make the app feel faster.
- Focused on making the UI responsive and easy to use across different screen sizes.

Credit Card Financial Dashboard *Power BI | PostgreSQL | DAX | .pbix*

- Built a Power BI dashboard using customer and credit card transaction data to track spending behavior and card usage.
- Created two dashboard pages — one showing transactions (revenue, card types, spending categories, quarterly trends) and one showing customer details (age, job, state, gender, and spending by group).
- Used DAX to build custom measures like total spend and credit utilization, and Power Query to clean and structure the data.
- Published the dashboard with scheduled refreshes so it stays updated automatically.

CERTIFICATIONS

- Gemini Certified Student – Google for Education (2025)
- AI & ML Masterclass – Eureka Association, in collaboration with REVA University
- Full-Stack Developer Industry Simulation – covered scalable web application workflows (internship Studio)

SOFT SKILLS

- Analytical Thinking • Problem-Solving • Debugging • Team Collaboration • Communication • Time Management
- Adaptability • Quick Learner

EXTRACURRICULAR ACTIVITIES

- Football – play regularly and enjoy competitive matches.
- Swimming – practice on a regular basis.
- Video Gaming – enjoy exploring different game genres.

LANGUAGES & INTERESTS

Languages: English, Hindi

Interests: Football, Swimming, Video Games
